We are developing a 2nd edition of the Project CALC text, *Calculus: Modeling and Application*, as an entirely online book with built-in student interactions. The text is being class-tested at Hood College (MD) in all sections of Calculus I (Fall, 2006) and Calculus II (Spring, 2007). We will demonstrate features of the text and report on feedback from the class testing. (Received September 26, 2006)
