**Mike Krebs\*** (mkrebs@calstatela.edu), Dept. of Mathematics, Cal State LA, 5151 State University Drive, Los Angeles, CA 90032. *Tell Me What You Can About A Group Of Order  $n$ .*

In this talk, we describe a project that can be used in courses whose main focus is group theory. The project is as follows. Each student in the class is assigned a random number  $n$  from 1 to 1000. The task is to say as much as possible about a group of order  $n$ . Must it be simple? Must it be solvable? Can you classify all groups of order  $n$ ? We will discuss how students can use software packages such as GAP and MAGMA to tackle the latter question. (Received September 12, 2006)
