Sci., University of Central Missouri, Warrensburg, MO 64093. *The Modified Moore Method versus the Traditional One: A Case Study*. Preliminary report.

There are different schools of thought when it comes to delivering classroom instruction, those who support and use the traditional way of teaching, those who prefer the Modified Moore Method (MMM), and others who prefer a different style of teaching. In this paper, the MMM and the traditional way of instruction will be discussed and compared based on a case study. (Received September 15, 2008)
