

1056-H1-1095 **Andrew B. Perry*** (perryand@yahoo.com). *Warren Colburn's "First Lessons in Arithmetic"*.
Warren Colburn's "First Lessons in Arithmetic" (1821) and his other arithmetic and algebra books revolutionized the American mathematics curriculum. Colburn taught concepts rather than recipes and procedures, and pioneered the inductive method of instruction. He not only sold 3,500,000 books, but had a profound influence on the educators of his era, and indirectly, on mathematics education far into the future. (Received September 20, 2009)
