Navigating This Program

How to find the talk and the session when you know the name of the presenter:

The main program listing consists of the "Full Program" and the "Presenters of Papers Index" The Presenters Index, which starts on p. 41, is an alphabetical index to the presenters who have submitted abstracts. Look up the presenter by surname, and note the position number to the right of the name. Turning ahead to the Full Program, locate the talk by its position number, which will be in parentheses beneath the time of each talk.

In the "Full Program", the sessions which include talks with abstracts are numbered, and that session number is the first number in the position number. The second number is the number of the talk within each session.

The abstract number (for example, 1203-05-42029), is made up of the meeting number (1203), the primary MSC subject code (05, combinatorics) and the sequential abstract number generated during the abstract submission process.

If you wish to look at the abstract of a talk, go to the Joint Mathematics Meetings Presenters List at: https://jointmathematicsm meetings.org/meetings/national/jmm2024/2314_presenters.html, look up the surname of the presenter, and click on the abstract number.

To see all the talks listed by subject, please go to <https://meetings.ams.org/math/jmm2025/meetingapp.cgi/Index/Subject>, or the Abstracts of Papers Presented to the American Mathematical Society (online journal). The Journal lists the talks by subject code and then by the sequential abstract number.

List of Presenters (Detail)

Hernandez, F.	(323.114)
Hernandez, M.	(357.2)
Hernandez, R.	(311.6)
Herring, C.	(318.2)
Hersh, P.	(122.1)

.....
surname	position number

Full Program (Detail)

(122) AMS Special Session on the Open Neighborhood of Applied Topology, I

THURSDAY, JANUARY 09 8:00AM–12:00PM 614, Level Six,
Seattle Convention Center Arch at 705 Pike

Organizers: **Henry Hugh Adams**, Colorado State University
Evgeniya Lagoda, Freie Universität Berlin

The triangle pointing right indicates a talk that is accessible to students.

8:00AM ▶ (122.1)	<i>Uncrossing posets and the topological combinatorics of stratified spaces of electrical networks</i> Patricia L. Hersh* , University of Oregon (1203-05-42029)
8:30AM ▶ (122.2)	<i>Surfaces in the S^d-Cube</i> Dejan Govc* , University of Ljubljana, Faculty of Mathematics and Physics (1203-52-41721)
9:00AM ▶ (122.3)	<i>Topological Methods for Pattern Morphology of Vegetation in Drylands Ecosystems</i> Rachel A. Neville* , Northern Arizona University (1203-55-43960)
9:30AM ▶ (122.4)	<i>Topology and zeros of real-valued maps</i> Florian Frick* , Carnegie Mellon University (1203-55-41747)
10:00AM ▶ (122.5)	<i>On Tverberg-type and Mass Partition problems via Equivariant Topology</i> Nikola Sadovek* , Freie Universität Berlin, Pablo Soberón , Baruch College, City University of New York and Pavle Blagojević , Freie Universität Berlin, Mathematical Institute SANU, Belgrade (1203-52-41591)

Position Numbers

Abstract Numbers

Presenter's name is followed by an asterisk
